

Solyndra is looking for technicians, with strong manufacturing / maintenance experience, ideally working in a technology industry. Those interested in an exciting career in sustainable or solar energy are encouraged to apply for consideration.

Solyndra's Technical Career Fair on May 25th from 4-8 pm

Solyndra's unique cylindrical solar technology is changing the way the world looks at rooftop solar energy. As we prepare to bring our new factory online in Fremont, CA. there are opportunities for outstanding team members with technical experience in any of the following areas:

- Vacuum
- Wet Bench
- Electrical/Mechanical
- Automation/Robotics
- Laser/Optics
- PLC
- Thin Films
- Factory MES Software

The event will be an informal place to meet Solyndra managers and learn more about our technology and the requirements for these technical positions. Those interested should go to www.solyndra.com/technician and submit their resume. Qualified applicants will receive an invitation with the location of the event.
